

PRESS RELEASE | OCTOBER 2023

EDUCATION POLICY AND SUCCESS: EDUCATION WEEK 2023 CONFERENCE AT THE UNIVERSITY OF ICELAND: THE ECODIGITAL PROJECT

Reykjavik, Iceland

EDUCATION WEEK 2023, hosted at the esteemed University of Iceland, took place under the theme "Education Policy and Success: A Sustainable Future for Our Children." The event brought together education professionals, policymakers, and experts to discuss crucial issues impacting education and the future of our children.

A standout moment of the conference was the introduction of the EcoDigital project. Spearheaded by the esteemed academics Dr. Rannveig Björk Thorkelsdóttir and Dr. Jóna Guðrún Jónsdóttir, this project unveiled key insights derived from the comprehensive survey that was conducted in the previous months. The survey shed light on the awareness levels within school communities regarding the pressing issue of digital waste.

One of the highlights of the EcoDigital project was the unveiling of a comprehensive set of educational materials. These materials are thoughtfully designed to cater to teachers, students, parents, school administrators, and all other stakeholders interested in sustainable education practices.

The presentation of these results garnered significant attention and enthusiasm from an engaged audience at EDUCATION WEEK 2023. The EcoDigital project is set to make a significant impact on the education landscape by enhancing awareness and empowering educators and students to adopt eco-friendly digital practices.

About EDUCATION WEEK:

EDUCATION WEEK is an annual event held at the University of Iceland, dedicated to exploring and discussing innovative solutions and strategies for advancing education policies and ensuring a sustainable future for our children.
