PRESS RELEASE #10 | APRIL 2025

ECODIGITAL MULTIPLIER EVENT IN ROMANIA

Centrul Judetean de Excelenta Galati, ROMANIA

Galați, April 4, 2025 – Centrul Județean de Excelență Galați successfully hosted a multiplier event dedicated to disseminating the EcoDigital project, an initiative designed to promote sustainable digitalization in education. The event brought together 36 participants, including teachers, students, and educational specialists, in an engaging and interactive session that explored how digital resources can enhance both environmental responsibility and classroom experiences.

During the event, participants were introduced to the EcoDigital platform and its educational resources, gaining firsthand experience in how these tools can be effectively implemented across various subjects and teaching contexts. They also explored the lessons piloted within the project, recognizing their potential to make teaching more interactive, engaging, and environmentally sustainable.

Through practical demonstrations and discussions, attendees saw how sustainability-focused digital tools can be integrated into everyday teaching. The piloted lessons provided flexible, innovative approaches that can enhance the learning experience in any type of classroom, regardless of subject matter. Teachers left the event feeling inspired and equipped to incorporate these resources into their own lesson plans, ensuring that sustainability becomes a natural part of their teaching methodology.

The feedback from educators and specialists was overwhelmingly positive, with many emphasizing how the EcoDigital approach can make learning more dynamic while fostering critical thinking and environmental awareness among students. The event reinforced the importance of interdisciplinary education, demonstrating how sustainability principles can be embedded into digital learning strategies to create a more responsible and future-oriented educational system.

By hosting this event, Centrul Județean de Excelență Galați reaffirmed its commitment to innovation in education, paving the way for sustainable digital teaching practices to become a standard in classrooms. The success of this initiative highlights the potential of the EcoDigital project to reshape modern education, making it both technologically advanced and environmentally conscious.
