ECODIGITAL PROJECT

PRESS RELEASE | JUNE 2024

ECODIGITAL PILOT EVENTS AT BIG BANG SCHOOL, GREECE

Big Bang School successfully conducted the EcoDigital pilot workshops on May 30th, May 31st, and June 6th in Greece, engaging 84 students and 5 teachers from the 4th and 6th grades.

The workshops aimed to introduce students to digital technologies and foster awareness about their everyday use, while addressing environmental concerns related to digital footprint and waste management.

Modules included:

- Introduction to digital technologies and societal impact.
- Understanding the digital cloud and carbon footprint implications.
- Awareness of global digital waste management.
- Interactive role-playing for sustainability using recyclable materials.

The students showed high enthusiasm and expressed interest in additional modules. They gained insights into digital footprint awareness and social roles' impact on the environment.

Big Bang School plans to integrate these workshops into the school's core curriculum and initiate annual parent awareness events on digital waste management.
