ECODIGITAL PROJECT

PRESS RELEASE | JULY 2024

ECODIGITAL PILOT EVENTS AT CENTRUL JUDETEAN DE EXCELENTA GALATI

Galati, Romania - July 2024 - The EcoDigital Curriculum piloting activity took place at the Galati County Centre of Excellence from May to June 2024. This initiative involved lessons for students aged 13-15 (secondary school) and 10-12 (primary school), engaging 7 teachers and 89 secondary students, along with 2 teachers and 37 primary students.

The EcoDigital Curriculum aims to integrate sustainability and digital responsibility into education. The activities received positive feedback from students and teachers, who found the curriculum engaging and innovative.

Students shared their insights on environmental responsibility:
"I learned that it is not good to spend a lot of time on phones, not to change them too quickly, and to listen to music on a media file," said Iris F.

"I really liked the group discussions! It was fun to hear everyone's ideas on how we can reduce digital waste at school and home," remarked Sofia O.

Maria A. highlighted, "I didn't know how big of an impact our old gadgets can have. I now understand the importance of recycling our old electronics."

The event demonstrated the EcoDigital Curriculum's potential to foster environmental responsibility and digital sustainability among students, highlighting the importance of integrating such activities into regular curricula.
